The selected agency shall adopt a technology-enabled approach incorporating data-driven monitoring, exception reporting, compliance analytics, trend analysis, geo-tagged evidence collection, centralized dashboards, audit trails, and internal quality assurance mechanisms to deliver reliable, transparent, and evidence-based inspection outputs across multiple geographies.

2. Scope of Work

The scope of work shall include physical and virtual monitoring and verification of Testing Centers (100% target coverage, or as assigned by NSDC) using the Physical Inspection Application operated by the agency and monitored by NSDC. The agency shall ensure structured inspection methodology, standardized inspection protocols, evidence-based reporting, and real-time digital submission of findings.

Identify operational issues such as non-operational centers during scheduled session timings, assessor non-availability, attendance record discrepancies, data management system irregularities, and inactive session operations shall serve as mandatory verification checkpoints in every inspection.
The frequency of inspections will be monthly, each center will be inspected once a month; however, this may be increased as required on an occasional basis, depending on operational needs and monitoring requirements.
- **Establish Structured Monitoring Framework:** The agency shall establish a centralized monitoring framework including project management teams, state-level coordinators, and district-level deployment mechanisms. This framework shall be submitted to NSDC within 15 days of contract execution and reviewed and revised jointly on a quarterly basis based on feedback from NSDC, emerging inspection trends, and repeat non-compliance patterns.
- **Real-Time Observation Capture:** Inspectors shall capture observations in real-time through the approved inspection application including photographs, geo-tagged evidence, timestamps, and structured inspection findings. All submissions shall include mandatory GPS coordinates and time-stamped photographic evidence.

8.2. Evaluation Criteria

The evaluation process will consider the following parameters:

- The bidder's understanding of the scope of work and specific requirements of the assignment.
- Technical capabilities, including candidate's qualifications, relevant past experience, and proposed methodology in line with the eligibility criteria.
- Financial competitiveness, based on the submitted financial proposal.

8.3. Financial Evaluation and Selection Criteria

Based on the consolidated quarterly performance, NSDC may, at its sole discretion, reallocate testing centers between the two agencies, including increasing the share of the better-performing agency and reducing that of the other, subject to a

cap of 30% of total centers being reallocated in any single quarter, to ensure operational stability.

- **Reservation of Rights:** Notwithstanding the above mechanism, NSDC reserves the absolute right to allocate, re-allocate, or modify the distribution of testing centers between the agencies at any time during the contract period, based on performance, operational requirements, or any other consideration deemed fit, and its decision in this regard shall be final and binding on both agencies.
